

OVERSEAS SECURITY ADVISORY COUNCIL (OSAC)

Overseas Security Advisory Council - Guatemala

OSAC Country Councils are a liaison between U.S. private sector operating overseas and U.S. Embassies and Consulates in that country. Country Councils are established in foreign countries to exchange useful and timely information about security threats, concerns, and incidents among the United States Embassy, United States citizens, and American-owned organizations and their employees. The purpose is to promote the safety and security of the American private sector overseas. Country Council activities vary from country to country because of the local security environment, laws, and regulations. The OSAC Country Council in Guatemala City was established to further these goals in Guatemala in the service of the US government and its private sector constituency.
