

**19GT5020Q0108 – Questions and Answers
Radios and Radio Stations for Police**

1. The equipment you require (The 3 items) are in the UHF band?

The required equipment must operate in the UHF band, which is 403 MHz to 430 MHz.

2. The equipment that requires installation (mobile radios) in vehicles, what make and model of vehicles are they? And where are the vehicles located?

No equipment installation is required. There is already a current maintenance installation contract and the contracted company will do the installations.

3. The equipment that requires installation (base radios) where will they be installed? Physical location and conditions of the place are required to calculate the cable and accessories and if it is outside the city to add transportation and lodging expenses.

No equipment installation is required. There is already a current maintenance installation contract and the contracted company will do the installations.
